### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the reference to Giddey et al. disclose starches which are native starches which are sterilized with oil (col. 3, lines 30-36). Moses discloses a resistant starch that was sterilized with water (col. 1, lines 64-67, col. 6, lines 15-25). Applicants disclose in their specification on page 3, that resistant starch does not have high thermal stability, and unacceptable amounts of starch are lost if the starch is exposed to high temperature sterilization. Moses is not combinable with Giddey et al. since the Moses reference uses water to sterilize the resistant starch (claim 6, col. 6.). It would not have been obvious to substitute water for oil as in the instant case because oil and water are not equivalent. Regarding the reference to Giddy, it says any starch can be sterilized in oil. However the reference to Moses is not combinable with Giddy since Moses discloses sterilizing a resistant starch in water, and therefore, teaches away from sterilizing a resistant starch with oil as disclosed by Giddy.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
